

CGI's PAS® Modernizes Production Accounting for a Major Global Oil and Gas Company

A major oil and gas company was using a 27-year old application running on “out-of-support” hardware, that was not compliant with their current IT requirements, and without dedicated support. By implementing PAS®, CGI delivered a modern, user-friendly application with a team of experts eliminating the need for a dedicated support person.

Easily interface with SAP & EnergyLink reducing and removing paper copies being mailed.

PAS Roadmap from CGI included client's requirements for a modern application criteria.

Security; enabled the client to use Single-Sign-On (SSO) thus eliminating creation of multiple IDs.

“Users love PAS® and were looking forward to moving away from the legacy application”.
