

CGI's enVision helps junior oil and gas company to meet their strategic vision

A junior company with a growth strategy to target acquisitions in high netback properties, combined with organic growth through the drill bit. The client needed a financial management system that supplies them with the right information to make the best decisions. CGI's enVision enterprise and financial management system met their needs and helped support their vision for the future.

The challenge

The client needed a financial system that supported its current needs and has the opportunity to migrate to additional functionality.

How CGI Helps

CGI's enVision provides a clear snapshot of current finances and the ability to generate reports with a proactive view of the future. As a fully integrated and scalable modular solution, enVision produces financial information, including accounts payable and receivables, joint venture accounting and general ledger management.

The results

With a number of validations and controls over master files, as well as rigorous data entry and system processes, the client is confident of the quality of data the CGI's enVision provides. The solution also provides great flexibility in reporting in a remotely hosted environment and it is flexible, scalable and affordable.

"CGI's enVision application provides quality and timely information presented how we need it."
