

# Production Accounting Solution<sup>®</sup> (PAS<sup>®</sup>)

Help production accountants save time and eliminate errors.

## Integrated business solutions

PAS is one of CGI's integrated business solutions, designed to help energy businesses across North America with managing their upstream back office with greater cost efficiency, insight, and agility. Each of CGI's optimized business solution provides the advantages of:

### Full integration

with other CGI solutions as well as flexible architecture to integrate with other applications.

### Cloud based

infrastructure to minimize deployment and IT maintenance costs, plus speed up implementation.

### Advanced cybersecurity

for data protection and business continuity.

## PAS brings productivity and accuracy to production accounting and regulatory reporting.

PAS streamlines production accountants' administrative tasks, reduces risks of errors and addresses regulatory and audit challenges, even in organizations with limited staff.

As the energy industry evolves, production accountants must keep pace with intensifying regulatory requirements and peaks in asset acquisition and divestiture activity. In today's organizations of leaner staff, routine production accounting activities must be automated to reduce risks of errors and meet regulatory and audit challenges.

CGI's PAS frees production accountants from time-consuming data entry, enabling them to concentrate on complex allocations and strategic initiatives that deliver the

most value to the business. Designed for production accountants by production accountants, PAS is continuously evolved in collaboration with three major E&P companies in Canada incorporating collective best practices, process excellence, compliance standards and the latest technologies.

### Value of PAS for production accountants:

- **Streamlined production accounting**  
Production accountants are freed from time-consuming data entry and data processing allowing them to concentrate on complex allocations and strategic initiatives that deliver the most value
- **Faster processing of acquisition and divestitures**  
PAS ensures revenue, royalty and processing fee calculation accuracy, as well as government reporting at the moment assets are acquired or divested.
- **Industry-leading compliance**  
As regulatory requirements evolve, PAS strives for being first-to-market with updated reporting to maintain compliance.

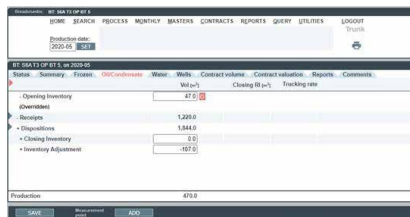

- **Month-end agility**

Production accountants can easily adapt to changes in facility ownership and product flow changes at any point in time with PAS' flexible month end close workflow.

- **Simple to learn, easy to use**

PAS is the industry's most intuitive system built by PAs for PAs, with comprehensive online help and an efficient knowledgeable support team.

- **Acquisitions and divestitures are streamlined** with an Excel data import / export utility for rapid asset data exchange to maintain accurate accounting.

## Solution capabilities

PAS equips users to rapidly and accurately calculate revenue, FH and ORR royalties, processing fees and meet regulatory requirements unique to Western Canadian oil and gas producers. It's the industry's simplest, most intuitive production accounting system and comes with comprehensive support options.

- **The dashboard pinpoints** if calculations are complete or incomplete to help production accountants make the best use of their time.
- **Intuitive workflow saves time** by clearly indicating what processes are required next with status icons and simple and efficient screen navigation.

- **Easy to use query / custom reporting** provides the industry's most efficient self-serve data reporting and export to Excel for further independent analysis.
- **Fully date-effective system** supports a flexible month end close.
- **Comprehensive reporting with rapid regulatory updates** provides industry-leading compliance certainty as government requirements evolve. Comprehensive reporting is available for partners, government regulators, and audit purposes – in PDF, CSV, XML and HTML formats.

## About CGI

### Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.
